SUSTAINABILITY & ENVIRONMENTAL CONSERVATION · SUSTAINABLE FOOD SYSTEMS · ETHICAL RESEARCH

ABOUT ME

Sustainability practitioner with ten years across research, project coordination and hands-on community work. What began as weekends restoring local nature reserves and tending a community garden became a career helping organisations cut their environmental impact and use resources well. I like bringing unlikely groups around one table — growers, municipalities, funders, sceptical operations managers — and leaving with a plan that survives contact with reality. Progress has to rest on evidence and honest practice, and my particular interests are regenerative food systems, biodiversity protection and climate resilience.

EXPERIENCE

Sustainability Project Coordinator

2021 — Present

Green Horizons Consulting

- Coordinate sustainability projects for local businesses reducing their environmental footprint, from first assessment to reporting.
- Run carbon footprint assessments and environmental reporting with client finance and operations teams.
- Write stakeholder engagement plans and facilitate workshops on sustainable practice.
- Support waste reduction and resource efficiency programmes, then monitor whether savings hold.

HIGHLIGHTS Cut operational waste for several clients through process change; led awareness initiatives that drew in both employees and neighbouring communities; rebuilt project reporting around data-driven evaluation.

Environmental Research Assistant

2018 — 2021

EcoFuture Research Institute

- Supported studies on biodiversity preservation and sustainable land management; collected, analysed and interpreted field data.
- Helped prepare publications, grant proposals and technical reports, and kept documentation to ethical research standards.
- Held the line of communication between researchers, community stakeholders and funding partners.

HIGHLIGHTS Contributed to several ecological restoration projects, overhauled research data management, and supported successful grant applications for conservation work.

Community Agriculture & Education Officer

2016 — 2018

Sustainable Food Network Foundation

- Delivered education programmes on sustainable food production and urban agriculture for schools, municipalities and local growers.
- Managed community gardens and their volunteers; ran workshops on composting, food waste and local food systems.
- Produced outreach materials and community engagement campaigns.

HIGHLIGHTS Grew participation in community food-growing programmes, built partnerships for environmental education, and introduced sustainable growing practice across several sites.
